

**KENTUCKY STATE  
UNIVERSITY**

## **BIOLOGY (BIO)**

---

### **BIO 101: Life Science**

A general study of biological concepts of living organisms. Emphasis is placed on cellular physiology, genetics, ecology, and evolution. (Two hours of lecture, two hours of laboratory per week)

**Credit Hours: 3**

**Contact Hours: 4**

### **BIO 103: Environmental Biology**

This course investigates the impact of humans on our environment and the impacts on resource sustainability, biodiversity, and human health.

**Credit Hours: 3**

**Contact Hours: 3**

### **BIO 107: Anatomy & Physiology I**

Study of basic chemistry, biochemistry, cell structure and function, tissues, the integument, and the skeletal, muscle, and nervous systems. Required for Nursing majors. (Three hours of lecture, two hours of laboratory per week)

**Credit Hours: 4**

**Contact Hours: 5**

### **BIO 108: Anatomy & Physiology II**

A continuation of BIO 107 with emphasis on the endocrine, digestive, respiratory, circulatory, urinary, and reproductive systems. Required for Nursing majors. (Three hours of lecture, two hours of laboratory per week)

**Prerequisite:** C or better in BIO 107 or consent of instructor

**Credit Hours: 4**

**Contact Hours: 5**

### **BIO 111: Principles of Biology**

Analysis of fundamental concepts underlying and unifying living systems. Emphasis on major principles of cellular anatomy and physiology, reproduction and development, genetics, ecology, and evolution. (Three hours of lecture per week)

**Prerequisite:** Either completion of or testing out of remedial courses

**Credit Hours: 4**

**Contact Hours: 5**

### **BIO 112: Modern Topics in Biology**

Formal presentations and colloquia on biological topics of current interest. Concise overviews will be presented on the diversity of living systems, evolution, and life processes. (Three hours of lecture per week)

**Prerequisite:** BIO 101 or BIO 111

**Credit Hours: 3**

**Contact Hours: 3**

### **BIO 115: Freshman Seminar**

**Prerequisites/Corequisites:** BIO 111, BIO 101, or consent of instructor. A seminar exploring the variety of careers in the biological sciences and closely-related disciplines; led by faculty, visiting scientists and practitioners.

**Credit Hours: 1**

**Contact Hours: 1**

### **BIO 116: Intro to Biotechnology**

This course familiarizes students with career options, necessary academic preparation, and how to search for job in biotechnology. In addition to lectures, students will visit several biotechnology companies in central Kentucky. (One hour of lecture per week plus field trips)

**Credit Hours: 1**

**Contact Hours: 1**

### **BIO 204: Fund of Microbiology**

Emphasis on infection by microbes, the body's immune system, pathogens, and parasites. Required for Nursing majors. (Two hours of lecture, two hours of laboratory per week)

**Prerequisite:** C or better in BIO 107 or recommendation of the Nursing Department

**Credit Hours: 3**

**Contact Hours: 4**

### **BIO 210: General Zoology**

Introduction to the animal world, including taxonomy and diversity of kind, morphological and physiological organization of representatives of various phyla; and evolutionary relationships among phyla. (Two hours of lecture, two hours of laboratory per week)

**Prerequisite:** BIO 111

**Credit Hours: 3**

**Contact Hours: 4**

### **BIO 212: General Botany**

Introduction to the plant world, including taxonomy and diversity of kind, morphological and physiological organization in various divisions, and evolutionary relationships among divisions. (Two hours of lecture, two hours of laboratory per week)

**Prerequisite:** BIO 111

**Credit Hours: 3**

**Contact Hours: 4**

### **BIO 220: Medical Terminology**

Designed to review common terms used in the medical professions.

**Prerequisite:** C or better in BIO 101, BIO 107, or BIO 111; or consent of instructor

**Credit Hours: 2**

**Contact Hours: 2**

### **BIO 301: Human Anatomy**

A study of the anatomical configuration of cells and tissues forming neural, muscular, renal, circulatory, respiratory, digestive, skeletal, and reproductive systems. (Three hours of lecture, two hours of laboratory per week)

**Prerequisite:** BIO 101 or BIO 111

**Credit Hours: 4**

**Contact Hours: 5**

### **BIO 302: General Microbiology**

**Prerequisite(s):** BIO 111 and CHE 102 (concurrent), or consent of instructor. Morphology, classification, distribution, and physiology of bacteria, viruses, and other microorganisms in industry and the environment. Aseptic technique, staining, cultivation, identification, and control of bacteria. (Three hours of lecture, three hours of laboratory per week)

**Credit Hours: 4**

**Contact Hours: 6**

**BIO 303: Human Physiology**

Cells, tissues, organs, and systems in relation to each other and in coordination with contractility, conductivity, respiration, translocation of materials, and other problems in physiology. (Three hours of lecture, three hours of laboratory per week)

**Prerequisite:** BIO 210 and CHE 102; PHY 207 and PHY 208 are recommended

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 304: Vertebrate Embryology**

Study of morphological and developmental aspects of embryology, including genetic and molecular mechanisms. The comparative developmental anatomy of the starfish, frog, chick, and mammals are studied. (Three hours of lecture, three hours of laboratory per week)

**Prerequisite:** BIO 111 or consent of instructor

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 305: Comp Vertebrate Anatomy**

Relationships of vertebrate groups and structure and significance of various organs and systems of typical vertebrates. Discussions of the history and habitats of various groups. (Two hours of lecture, four hours of laboratory per week)

**Prerequisite:** BIO 210

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 307: Genetics**

Explores the laws and principles of heredity and genetic variation in organisms. Topics include aspects of Mendelian genetics, quantitative genetics, and molecular genetics, as well as principles of developmental, behavioral, population, and evolutionary genetics. (Three hours of lecture, three hours of laboratory per week)

**Prerequisite:** BIO 111 with C or better and CHE 102 with C or better

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 308: Microtech & Histology**

A lecture/laboratory course dealing with microscopic anatomy of various tissues in the human body. Theories of microscopic techniques and tissue development are also discussed. (Three hours of lecture, three hours of laboratory per week)

**Prerequisite:** BIO 111

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 309: Parasitology**

A study of epidemiology, pathology, diagnosis, and control of parasites of man and other animals. (Two hours of lecture and four hours of laboratory per week)

**Prerequisite:** BIO 210 or consent of instructor

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 315: Immunology**

Immune system, immunoglobulin structure, antigenicity, antigen/antibody reactions, phylogeny of immune responses, and antibody formation. Immunity to bacterial and viral infections, allergies, and graft/host reactions. (Three hours of lecture/discussion/ demonstration/ laboratory per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 316: Ecology**

A study of the interrelationships of living organisms and their environment. This course draws from several disciplines and stresses concepts of modern ecology. (Three hours of lecture per week)

**Prerequisite:** BIO 111 or BIO 101, BIO 210, BIO 212, CHE 101, CHE 102

**Credit Hours:** 4

**Contact Hours:** 4

**BIO 317: Medical Microbiology**

Lecture and laboratory work in pathogenic bacteriology, virology, mycology, and parasitology. Emphasis on etiology, epidemiology, identification, and clinical diagnosis of pathogens. (Three hours of lecture, three hours of laboratory per week)

**Prerequisite:** BIO 302

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 318: Hematology**

A comprehensive study of the blood system, including the hematopoietic systems and disorders of the blood in humans. (Five hours of lecture/ laboratory per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 4

**Contact Hours:** 5

**BIO 319: Study Abroad Topics**

This course is designed for biology major students to receive credit for an upper level biology course taught abroad through an accredited study abroad program (e.g., CCSA, KIIS)

**Credit Hours:** 3-4

**Contact Hours:** 3-4

**BIO 321: Virology**

An upper level elective for biology major and health-related disciplines.

Emphasis on animal viruses. Credits: 3 semester hours.

**Prerequisite:** BIO 111 or BIO 101

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 399: Undergrad Teaching Exper.**

A comprehensive study of the blood system, including the hematopoietic systems and disorders of the blood in humans. (Five hours of lecture/ laboratory per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 1

**Contact Hours:** 1

**BIO 401: Biology Seminar**

Expose students to presentations of biological research by faculty and visiting scientists and allows students to formally present a research topic. Students are required to make a formal, oral presentation of a research topic with computer-generated audio-visual materials.

**Prerequisite:** Upper/division standing; senior classification recommended

**Credit Hours:** 1

**Contact Hours:** 1

**BIO 407: Fish Genetics**

An overview of fish genetics including basic principles and methods of selective breeding in aquaculture.

**Prerequisite:** Consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 408: Cell Biology**

Cell structure and chemistry as it relates to cell function. Biochemical and molecular aspects of cell functions are emphasized. (Three hours of lecture, three hours of laboratory per week)

**Prerequisite:** BIO 111 and either CHE 200 or CHE 302 with a grade of C or better

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 409: Biostatistics**

Basic principles of experimental design and data analysis with emphasis on their applications in aquaculture research.

**Prerequisite:** Consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 410: Special Problems Biology**

A course in which advanced Biology students pursue an independent experimental or library research project. May be repeated once for credit.

**Prerequisite:** Consent of instructor

**Credit Hours:** 2

**Contact Hours:** 2

**BIO 411: Fish Diseases**

Clinical diagnosis of fish diseases; necropsy of diseased fish; and formulation of corrective measures for disease control. (Three hours of lecture, two hours of laboratory per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 412: Fish Morphology and Physiology**

An overview of fish morphology and physiology with emphasis on comparative and adaptive aspects among Osteichthyes (true bony fish). (Three hours of lecture, two hours of laboratory per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 4

**Contact Hours:** 5

**BIO 413: Aquatic Ecology**

This course investigates the interaction of aquatic organisms with their biotic and abiotic environment. Sampling and laboratory methods of limnological; analysis will be covered. (Three hours of lecture, three hours of laboratory per week)

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 414: Basics of Fish Diseases**

An online course with no lab. Students are introduced to bacteria, parasites, viruses and environmental factors that cause disease in aquatic animals. Prevention, identification and treatment of these diseases are included (course intended for non-aquaculture majors). Credit: 3 semester hours.

**Prerequisite:** Consent of Instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 415: Animal Behavior**

This course examines the behavior of non-human animals from a physiological, ecological and evolutionary perspective. (Three hours of lecture per week)

**Prerequisite:** BIO 111 and BIO 210; BIO 316 recommended

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 417: Ecological Field Meth**

) Lecture, field and laboratory course emphasizing modern ecological field techniques. Compares quantitative and qualitative methods of sampling and interpreting data. (Two hours of lecture, four hours of laboratory per week)

**Prerequisite:** BIO 111, BIO 210, BIO 212, CHE 101, CHE 102; BIO 316 recommended

**Credit Hours:** 4

**Contact Hours:** 6

**BIO 421: Fish Nutrition**

Fundamental and applied aspects of fish nutrition including nutrient requirements, nutrient chemistry, ration formulation, and practical feeding will be taught. (Three hours of lecture per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 422: Principles of Aquaculture**

Introduction to principles underlying aquatic productivity and management with a survey of domestic and foreign cultures of fish and aquatic vertebrates.

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 423: Aqua Economics/Marketing**

Aquaculture economics, marketing channels and consumer preferences for fish products will be presented. (Three hours of lecture, two hours of laboratory per week)

**Prerequisite:** MAT 120 or MAT 125 or consent of instructor

**Credit Hours:** 4

**Contact Hours:** 5

**BIO 427: Fish Reproduct & Spawning Tech**

An overview of basic biology of fish reproduction and techniques of artificial spawning for common aquaculture species.

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 431: Biotechnology I**

This course will familiarize students with aspects of plant and animal tissue culture including: historical development, basic techniques, safety issues, media formulation and preparation, and culturing tissues. (Two hours of lecture/ Four hours of laboratory per week) Preg: BIO 111, CHE 301 and CHE 310.

**Credit Hours:** 4

**Contact Hours:** 4

**BIO 432: Biotechnology II**

This course offers an introduction to the molecular tools used in DNA biotechnology including purification of nucleic acids, cutting and joining DNA, vectors, sequencing DNA, genomic and cDNA libraries, RFLPs, Souther Blots, and PCR. (Two hours of lecture/ Four hours of laboratory per week) Prereq: BIO 431

**Credit Hours:** 4

**Contact Hours:** 4

**BIO 433: Biotech III: Proteins**

This course covers aspects of protein chemistry and immunology pertinent to biotechnology including: amino acid structure and analysis, polypeptide structure; protein sequencing, immunoglobulins, diagnostic application of monoclonal antibodies, SDS-PAGE, spectrophotometric analysis of proteins, and immuno-chemical methods of diagnostics. (Four hours of lecture/laboratory per week)

**Credit Hours:** 3

**Contact Hours:** 4

**BIO 434: Biotech IV: Adv Biotechnology**

This course allows students to utilize and extend previously learned biotechnological principles and techniques used in industrial research and development, with special emphasis on pharmaceutical and value-added products. (Three hours of lecture and three hours of laboratory per week)

**Credit Hours:** 3

**Contact Hours:** 6

**BIO 435: Global Persp in Biotechnology**

This course critically surveys potential impacts of biotechnology from a global perspective, providing an understanding of issues and values information different viewpoints on biotechnology. (Three hours of lecture per week)

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 436: Biotech Writing/Presentations**

This course will focus on effective communication of ideas and research results in biotechnology, specifically publishing a scientific paper and making presentations at scientific meetings. Students will write a paper and present a talk on data they have been assigned at the beginning of the semester. (Three hours of lecture per week)

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 437: Environmental Sci/Bioremed**

The fate and transport of pollutants in the environment and their final destination, dilution, dispersion, adsorption, persistence, degradation, their adverse effects, and the route these pollutants take in the environment will be discussed and possible solutions and remediation techniques will be presented. (Four hours of lecture/laboratory per week)

**Credit Hours:** 3

**Contact Hours:** 4

**BIO 438: Forensics**

Lectures focus on the fundamental principles and concepts in disciplines of biology such as serology, entomology, and molecular biology relevant in forensic investigations. Students learn serological, microscopic, and DNA related techniques used in forensic sciences in laboratory. (Four hours lecture/laboratory per week)

**Credit Hours:** 3

**Contact Hours:** 4

**BIO 451: Survey of Production Methods**

An overview of alternative production methods including ponds, cages, net-pens, raceways, and recirculating systems with application to suitable species. (Three hours of lecture per week)

**Prerequisite:** AQU 422 or consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 460: Water Quality Management**

A survey of theory and practice into the understanding and manipulation of the biological, chemical, and physical aspects of water quality in aquaculture production. (Three hours of lecture, two hours of laboratory per week)

**Prerequisite:** Consent of instructor

**Credit Hours:** 3

**Contact Hours:** 3

**BIO 461: Water Quality Management Lab**

**Credit Hours:** 1

**Contact Hours:** 1

**BIO 490: Biological Practicum**

An on-the-job clinical practice (Clinical Laboratory Sciences).

**Prerequisite:** Consent of advisor

**Credit Hours:** 12

**Contact Hours:** 12

**BIO 493: Internship**

An intensive experience in a biological/medical field involving practical on-site participation.

**Prerequisite:** Consent of advisor

**Credit Hours:** 1-4

**Contact Hours:** 1-4

**BIO 495: Topics in Biology**

This course requires intensive examination of a biological topic chosen by a faculty member in biology. Will involve intensive reading and discussion, as well as writing.

**Prerequisite:** Senior status

**Credit Hours:** 3

**Contact Hours:** 3
